Company Description / Competitive Strengths

VCPI understands that smart IT drives business. As the leading IT consulting and integration firm focused exclusively on Long Term Care and Senior Housing, our experience in service delivery for nearly 1700 facilities demonstrates a “reduction in providers’ total cost of ownership by as much as 3 points of revenue. VCPI’s strengths lie in leveraging a complete understanding of the complexities of the LTC industry with the largest credentialed staff in the LTC marketplace. Our services are meant to enable LTC professionals to focus on resident care rather than the management of complex IT infrastructures and multiple technology vendors.
